## Subject index to volume 24

Action	89	Electronic commerce	3, 29, 55
Adaptive behavior	73	Electronic commerce mechanisms	17
Adaptive decision support systems	73	Electronic markets	3
Analytic hierarchical process	223	Energy policy	233
Anti-competitive behavior in electric generation markets	251	Environmental decision support systems	127
Area control error	243	Executive support systems	89
Artificial neural networks	105	Feedback	145
Autonomous agents	269	Frequency regulation	243
Available transfer capability (ATC)	321	Fuzzy neural networks	105
Bidding policies	175	Games	207
Bus voltage security	223	Generation bidding	175
Buyer welfare	3	Generation competition	175
Cognitive aids	145	Hidden failures	259
Collaboration	269	Importance sampling	259
Competitive electricity market	193	Incentive compatibility	17
Competitive electricity markets	183	Independent System Operators	183
Competitive environment	223	Information economics	3
Complexity	145	Information policies	175
Consumer benefit	279	Internet marketing	29
Cost-benefit analysis	223	Intranet	55
Cost of ownership	45	Intranet software	45
Customer satisfaction	45	ISO	233
Data integrity	55	Knowledge level	73
Data security	55	Lagrangian relaxation	311
Decision support system	145	Load-frequency control	243
Decision support systems	73, 89, 165	Load models	279
Deregulation	193, 243	Managerial intuition	89
Distributed cognition	89	Market dynamics	233
Disturbance propagation	259	Marketing systems	45
Double auctions	17	Market power	183, 207
Ecological psychology	89	Market structure	3
Economic pricing	55	Mental model	89
Eigenvalues	233	Mixed market model	3
Electric generator governor control, eigenvector placement	251	Model integration and re-use	127
Electricity demand	279	Model management	127
Electricity supply	279	Multi-agent systems	269
Electric power auction	193	Network congestion	233
Electric power systems	207		
Electric reliability	175
